

**UNIT PLANNING TOOL**

**Planning Focus: Geometry**

**Module(s)/Unit(s) Unit 5: Geometry & Measurement**

CCSS.MATH.CONTENT.5.NBT.B.7: Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.

CCSS.MATH.CONTENT.5.NF.B.3: Interpret a fraction as division of the numerator by the denominator ( $a/b = a \div b$ ). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem.

CCSS.MATH.CONTENT.5.NF.B.4 (4a, 4b): Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction.

CCSS.MATH.CONTENT.5.NF.B.5 (5a, 5b): Interpret multiplication as scaling (resizing)

CCSS.MATH.CONTENT.5.NF.B.6: Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem.

CCSS.MATH.CONTENT.5.NF.B.7 (7a, 7b, 7c): Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions.

**Mathematical Practices being emphasized:** MP 1: Make sense of problems and persevere in solving them; MP 3: Construct viable arguments and critique the reasoning of others; MP 5: Use appropriate tools strategically

**Essential Questions**

How can we use models to help us multiply and divide decimals?  
What are some patterns that occur when multiplying and dividing problems with decimals?  
How can we describe how much someone gets in a fair-share situation if the fair share is between two whole numbers?  
What does dividing a unit fraction by a whole number look like? • What does dividing a whole number by a unit fraction look like?

**Key Concepts**

Multiply a decimal by a whole number  
Multiply and divide decimals  
Fractions as division  
Understand multiplication by a fraction  
Multiply fractions to find area  
Understand multiplication as scaling  
Understand division with unit fractions  
Solve word problems with fractions and decimals

**Visual Models/ Algorithms/ Diagrams for Compendium**

See attached Compendium

**Pre and Post Assessments**

1) Write the following decimals as fractions:  
a. 0.75.                      b. 0.4

2) Wolve the problem and show your work.  
 $2.7 + 3.4 =$

**Elena has 100 math problems to finish this week. She finishes  $\frac{2}{10}$  of the problems on Monday and  $\frac{25}{100}$  of the problems on Tuesday.**

3) Shade the models to show the fraction of math problems that Elena finishes on Monday and Tuesday.

4) What fraction of the math problems for the week does Elena finish on Monday and Tuesday?

5) A farmer plants corn in his field. What fraction of his field does the farmer plant with corn as shown below.

6) Solve the problem. Show your work.

**family eats  $\frac{3}{8}$  of whole box of cereal each day. What fraction of the box of cereal does the family eat in 2 days?**

**Connections (Real World Applications)**

Architects  
 Engineers  
 Pharmacists  
 Nurses  
 Financial Analysts  
 Data Analysts  
 Chefs  
 Accountants

**Language Functions/Structures**

*Functions: Explain, Describe, Justify, Compare*

The fraction \_\_\_\_\_ is the same as the decimal \_\_\_\_\_.

80 hundredths is equal to \_\_\_\_\_.

The product is \_\_\_\_\_ because \_\_\_\_\_.

\_\_\_\_\_ of \_\_\_\_\_ is \_\_\_\_\_.

\_\_\_\_\_ are parts of a whole.

When dividing decimals by whole numbers, you first \_\_\_\_\_.

\_\_\_\_\_ is \_\_\_\_\_ and \_\_\_\_\_ hundredths

**Vocabulary**

Decimal	factor	place value	product
Numerator	denominator	whole number	mixed number
Tenth	hundredth	thousandth	quotient
Divisor	equivalent fraction	unit fraction	decimal point

**Focus and Motivation**

Songs – Multiplying Decimals Song by NUMEROCK: <https://www.youtube.com/watch?v=nHg4RVqQ12E>

## Multiplying Decimals

Whole number	x decimal
1	0.1
2	0.2
3	0.3
4	0.4
5	0.5
6	0.6
7	0.7
8	0.8
9	0.9

$$3 \times 2.4 = 7.2$$

Partial products

$$3 \times 2.4 = 7.2$$

## Dividing Decimals

has \$11.20 to buy some ribbon. Each foot of ribbon costs 8¢. How many feet of ribbon can \_\_\_\_\_ buy? 15 ft

$$\begin{array}{r} 1620 \\ - 40 \\ \hline 1580 \\ - 40 \\ \hline 1540 \\ - 40 \\ \hline 1500 \end{array}$$

# Decimals and Fractions

decimal x decimal

3. 15

$$\frac{\text{fraction} \times \text{fraction}}{\frac{w}{2} \times \frac{w}{2}} = \frac{6}{12}$$

$$\begin{array}{r} \omega/2 \\ \times \\ \hline \omega \\ \hline \omega/2 \end{array}$$

# Multiplying Fractions

Mixed Number	$\times$	Mixed Number

$$\frac{7}{2} = \frac{7}{2} \times \frac{3}{3} = \frac{21}{6}$$

## Dividing Fractions

whole number	÷	unit fraction
-----------------	---	------------------

— had 4 cakes.  $\frac{1}{3}$  of a cake is a serving. How many servings of a cake does — have?

\_\_\_\_\_ has 12 servings  
of cake.

# Mathematical Standards and Practices

What we know...

Inquiry / What we want to learn

1. We will use appropriate tools when we multiply and divide decimals.

3. We will make sense of real-world multiplication and division fraction problems and persevere in solving them.
